My name is Korir Kibet Charles, I am 20 years old and I am a self-taught full-stack developer with strong understanding of modern javascript ES6, HTML5, CSS3 and passionate developer who is proud of my work.

For the past two years, have been learning frond-end web development and working as a self starter candidate developing web pages using html, css and javascript where I learned a lot of theory in subjects like corporate communication, javascript, React.js, HTML5, CSS3, jQuery, Bootstrap, Node.js and Linux/Unix programming.

I recently got enrolled to ALX AFRICA to expound my understanding of programming and get all that it takes to be full stack developer.

While I don't have any real-life work experience, I've had a lot of exposure fundamentals of web programming. I have outstanding communication and responsible for working on the frontend(React) and backend(Node.js)

Moving forward, I hope to expand my experience across different industries and particularly fintech. I've worked hard in my education and now I'm ready to leverage everything I've learned and get some hands-on work experience.

Skills

Front-end dev	■■■■■ Excellent
Data Structure & Algorithms	■■■■■ Excellent
